Manual

Datenbanken und Web-Techniken

Project Task

To run the project:

1. Copy the ZIP folder to the server (for example Apache, XAMPP or Wampp) and Unzip code files.

2. Import the **feeds.sql** file to the selected database in PhpMyAdmin.

3. If Database connection is not established then Open **connect.php** and configure the setting with following PHP code with specific user name and password.

```php
<?php
    $servername = "localhost";
    $username = "root";
    $password = "";
        $db = "feeds";
    // Create connection
        $conn = new mysqli($servername, $username, $password, $db);
?>
```

4. Open the browser and run the code with link *localhost/grabData/*

5. The project should run without any issue. The following news page should be displayed
